DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 6,092,903 to Higgins, Jr.

Higgins, Jr. disclose a plated synthetic resin member comprising a manually operating main body 30 made of a translucent synthetic resin, specifically polycarbonate, a translucent plating coat 35 formed on the surface of the main body having a metallic gloss, and a built-in lamp 20 that can light up.

3. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 2,760,050 to Porsche.

Porsche discloses a plated synthetic resin member for a vehicle, wherein a lock release lever 16 provided on a door 11 of an automobile comprises a lever main body 20 molded from a translucent synthetic resin, and a translucent plating coat, i.e. the red coloring disclosed in column 2, lines 25-30, formed on the surface of the lever main body that faces a vehicle compartment, wherein the lever main body comprises a built-in lamp 13 that can light up.

4. Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat. No. 4,222,435 to Kumagai.

Kumagai discloses a plated synthetic resin member for a vehicle, wherein an operating knob 50 of an air-conditioner outlet vent device provided in an instrument panel of an automobile comprises a knob main body 501 molded from a translucent synthetic resin, namely acrylic as disclosed in column 5, lines 50-57, and a translucent plating coat 502 of formed on the surface of the knob main body that faces a vehicle compartment, wherein the knob main body has a built-in lamp 65 that can light up.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Porsche in view of Higgins, Jr.

Porsche discloses the subject matter of claim 4, as discussed above, but does not disclose the specific material used for the lever main body 20. Higgins, Jr. teaches that it is known to provide polycarbonate as a translucent material for transmission of light. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the body 20 of Porsche in polycarbonate as taught by Higgins, Jr., since Higgins, Jr. states at column 3, lines 25-30 that polycarbonate transmits light readily, and further as polycarbonate would provide impact resistance to the lever main body increasing durability thereof.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses several vehicle door handles with built-in lamps, translucent resin construction, and metallic gloss plating.
